Employee Presence Management

Cloud Visitor, Employee, Contractor, and Evacuation Management.

Safety, security and certainty starts with knowing who is on your site. WhosOnLocation gives you real-time visibility of those employees who are on-site and those who are not. It's simple to use, because your employees have the option of tagging in and out from their PC's, Mac's, laptops, smartphones, cards, kiosks, or via reception. Employee Presence Management adds reliability to your Evacuation Management and improves site security and safety. It also makes time and attendance reporting a smoother and more accurate process.

FEATURES

- Employee attendance reporting
- Evacuation reporting
- Supports employee movement between other offices and sites
- Opt-in geo-location tagging
- Access Control data sharing and integration

FROM ONLY
