

Press Release

WhosOnLocation enriches the visitor experience with New Calendar Integration

February 2017

WELLINGTON, NZ – WhosOnLocation, a web-based people presence and visitor management system announced today the release of its new Calendar Invites integration. Now, employees using the world's most common calendars like Outlook and Google Calendar automatically create pre-registered visitors in their organization's WhosOnLocation account when inviting attendees to a meeting. Reception lobby and security teams gain full visibility of visitors and other guests coming onsite based on the attendees invited to Calendar events by the organization's employees.

"Outlook and Google Calendar is the most commonly requested integration among our customers," said Ben Everist, Customer Experience Manager at WhosOnLocation.

"Visitor pre-registration and how easy it is for employee's to use it is often where user adoption is built. Having a seamless integration between an employee's calendar invitations and their organization's visitor pre-registration process allows our customers to gain traction quicker, said Mr Everist."

WhosOnLocation Calendar Invites provides a seamless, easy to deploy integration with new functionality that includes:

- * **Automatic Pre-registration Events Created** When users invite attendees to a meeting via their Calendar WhosOnLocation automatically creates the pre-registration event listing attendees as visitors.
- * **Employee v Visitor Recognized** Employees included in the attendee list are recognised by WhosOnLocation as such and not included as pre-registered visitors.
- * **Meeting Rooms Recognized** Meeting rooms and other resources included in the attendee list are recognised by WhosOnLocation as such and not included as pre-registered visitors
- * **Groups Supported** When a calendar event has multiple attendees WhosOnLocation automatically makes the pre-registration event a 'group visit'.
- * **Edit Friendly** Users can update a Calendar event's date, time, and/or subject and the update seamlessly updates the pre-registration record. Additionally, when a user adds a late attendee to an existing calendar event, the new attendee is added to the list of pre-registered visitors.

We have everything sorted so you can **get on with the things you're good at.**

*** Visitor Profile Integrity** Visitors are sent automatically sent a link to the organization's Visitor Portal where they can edit and update any pre-required visitor information – and this information is remembered for subsequent visits in the future.

“Visitor pre-approval and pre-registration are key processes for maintaining control and enhancing security at our customer sites,” said Darren Whitaker-Barnett, CEO and Founder of WhosOnLocation.

“Now with this calendar integration, organization's wanting to deploy a visitor pre-registration policy have a seamless, effective method which does not require their employees to log into WhosOnLocation, said Whitaker-Barnett.

Calendar Invites is available with every WhosOnLocation Plan as a free Integration.
